

Expanding Blockchain Access with Blockdaemon API

Within 90 days, Blockdaemon expanded its access offering to a top global crypto analytics firm and enabled it to scale to 10+ protocols using API Access and dedicated nodes.

Fast, Scalable, and Flexible:

DAY 0

Customer Onboarded	Upgraded 30 days after free trial	100% tier capacity utilization @ ~22M calls / month	Continued API usage and self-service deployment	
Starter Tier	Growth Tier	Scaled to 8 Self-Service Nodes	1 Additional Self-Service Node	Expand API Coverage 5+ Additional Protocols / Nodes
 Committed to the relationship from the start. Even prior to onboarding, the Blockdaemon team maintained an active dialogue with the client and helped answer all queries. Client partnered with Blockdaemon as we matched their requirement of having a low latency API. Blockdaemon's multiprotocol API platform provided scalability and speed without any developer costs. 	Ongoing effort with dedicated resources across sales, technical account management, and product management to understand client needs and solve any drawbacks.	Solution tailored to the client's use case and urgency. Client wanted to deploy nodes as they wanted their own instance of receiving transactions, mainly to verification purposes.DogecoinImage Client Image Client Client DogecoinDogecoinImage Client Image Client Image Client Client Image Client Image Client 	 API + Node Solution for specific needs. Client connected to the node in order to extract the entire historical blockchain via RPC. Positive feedback on node deployment through Blockdaemon Marketplace app. 	Continue providing the client with high levels of service to address needs as best as possible. As a trusted partner, Blockdaemon will understand the client's roadmap and continue providing a high leve service (in line with 99.9% enterprise SLAs) as they expand access.

Blockdaemon API Suite

- Query blockchain data and broadcast transactions
 for 22+ protocols without having to operate or
 manage nodes
- API suite includes REST, RPC access, NFT API, and other specialized APIs. Up to 10 API keys provisioned on API gateway
- ✓ 24/7 on-call incidence support, high scalability and best-in class uptime

Dedicated Nodes

- Managed blockchain nodes or nodes clusters
 deployed exclusively for your dedicated use for
 60+ protocols
- Native RPC Access Only. Leverage our scale to deployment from major cloud and bare metal providers based on your regional preference
- Fully managed service covering protocol updates, security patches, and hardware upgrades to ensure

nodes run securely and at optimal performance

Why Choose Blockdaemon?

Risk Mitigation, Security & Crypto Optimized Infra

- Proactive Security
- 24/7 Monitoring
- Vulnerability Management
- High Availability & Privacy By Default

Adherence to Highest Level of Compliance

- ISO 27001 Certified
- Proactive Leaders in Crypto Organizations
- Ompliant with GDPR, UK GDPR, US (CCPA, etc)
- B On-chain behavioral indicators and risk scoring
